

INTERNATIONAL SEARCH REPORT

International Application No
PCT/GB2004/001272

A. CLASSIFICATION OF SUBJECT MATTER IPC 7 C12Q1/18 C12Q1/48 C12Q1/32		
According to International Patent Classification (IPC) or to both national classification and IPC		
B. FIELDS SEARCHED Minimum documentation searched (classification system followed by classification symbols) IPC 7 C12Q		
Documentation searched other than minimum documentation to the extent that such documents are included in the fields searched		
Electronic data base consulted during the international search (name of data base and, where practical, search terms used) EPO-Internal, BIOSIS, WPI Data, PAJ, FSTA, EMBASE		
C. DOCUMENTS CONSIDERED TO BE RELEVANT		
Category *	Citation of document, with indication, where appropriate, of the relevant passages	Relevant to claim No.
X	KOUL A ET AL: "SERINE/THREONINE PROTEIN KINASES PKNF AND PKNG OF MYCOBACTERIUM TUBERCULOSIS: CHARACTERIZATION AND LOCALIZATION" MICROBIOLOGY, SOCIETY FOR GENERAL MICROBIOLOGY, READING, GB, vol. 147, no. 8, August 2001 (2001-08), pages 2307-2314, XP001162730 ISSN: 1350-0872 the whole document, in particular p.2313, left-handed column, 3rd paragr. <div style="text-align: center;">--- -/--</div>	4-12

INTERNATIONAL SEARCH REPORT

International application No.
PCT/GB2004/001272

Box II Observations where certain claims were found unsearchable (Continuation of item 2 of first sheet)

This International Search Report has not been established in respect of certain claims under Article 17(2)(a) for the following reasons:

1. ☐ Claims Nos.:
because they relate to subject matter not required to be searched by this Authority, namely:
2. ☒ Claims Nos.: 1-3
because they relate to parts of the International Application that do not comply with the prescribed requirements to such an extent that no meaningful International Search can be carried out, specifically:
see FURTHER INFORMATION sheet PCT/ISA/210
3. ☐ Claims Nos.:
because they are dependent claims and are not drafted in accordance with the second and third sentences of Rule 6.4(a).

Box III Observations where unity of invention is lacking (Continuation of item 3 of first sheet)

This International Searching Authority found multiple inventions in this International application, as follows:

1. ☐ As all required additional search fees were timely paid by the applicant, this International Search Report covers all searchable claims.
2. ☐ As all searchable claims could be searched without effort justifying an additional fee, this Authority did not invite payment of any additional fee.
3. ☐ As only some of the required additional search fees were timely paid by the applicant, this International Search Report covers only those claims for which fees were paid, specifically claims Nos.:
4. ☐ No required additional search fees were timely paid by the applicant. Consequently, this International Search Report is restricted to the invention first mentioned in the claims; it is covered by claims Nos.:

Remark on Protest

- ☐ The additional search fees were accompanied by the applicant's protest.
- ☐ No protest accompanied the payment of additional search fees.

FURTHER INFORMATION CONTINUED FROM PCT/ISA/ 210

Continuation of Box II.2

Claims Nos.: 1-3

Present claims 1-3 are so broad and unclear that a meaningful search over the whole scope of the claims is not possible. The method of claim 1 is not limited to a specific microorganism but refers to ANY microorganism. Furthermore, not a specific metabolic pathway has to be inhibited but ANY kind of metabolic pathway essential for viability. The expression "metabolic pathway ESSENTIAL FOR VIABILITY" is per se not clear in the sense of Article 6 PCT. When a pathway is essential depends very much on the growing conditions of the microorganism. Is an essential "product" missing in the growing medium and the microorganism is able to synthesize said "product" then the biosynthesis pathway for said "product" which could be part of a metabolic pathway is an essential pathway for viability. However, if said "product" is comprised in the growing medium, then biosynthesis of said "product" can be redundant and thus the biosynthesis pathway for said "product" is not anymore essential for viability.

Due to this inaccuracy the true scope of the claim(s) is not clear and can thus not be searched.

Even if one would consider the claim clear, it would still not be in accordance with the requirements of the PCT since, due to the above mentioned breadth (ANY microorganism, ANY metabolic pathway) it would embrace too many possibilities not being substantially supported by the description. The same applies to claims 2 and 3.

As a consequence, the search has been limited to the specific example disclosed in the description namely the attenuation of Mycobacterium through the inhibition of a kinase in particular the pKnG kinase.

The applicant's attention is drawn to the fact that claims, or parts of claims, relating to inventions in respect of which no international search report has been established need not be the subject of an international preliminary examination (Rule 66.1(e) PCT). The applicant is advised that the EPO policy when acting as an International Preliminary Examining Authority is normally not to carry out a preliminary examination on matter which has not been searched. This is the case irrespective of whether or not the claims are amended following receipt of the search report or during any Chapter II procedure.
